

# Prescribing and Pharmacy

---

POW RMO and Registrar  
Orientation 2023

Ian Fong (Senior Pharmacist, Education and Training)

# Prescribing

At POW, there are several different systems used to prescribe medications

## Electronic

- eMR Powerchart
- FirstNet – in ED
- eRIC – in ICU
- MOSAIQ – for chemotherapy

## Paper

- PBS prescriptions
- Outpatient prescriptions
- Paper charts in some clinical areas (e.g. operating theatres)
- Paper charts for some specific medications (e.g. IV heparin, TPN, PCA)

**PRESCRIPTION** \*ONLY valid for supply to hospital patients at this Hospital Pharmacy 8666:

# Individual Patient Usage (IPU)

- Required for:
  - Initiating any medication not on the formulary
  - Using a medication for an off-label indication
- Supporting evidence for the proposed medication/indication is required
- Completed form
  - Signed by your Head of Department
  - Signed by your Nursing or Medical Co-director of your clinical stream
  - Sent to pharmacy
  - Reviewed by the Medical Director of Clinical Service (interim approval can be obtained if treatment is urgent)
  - May also need approval from the General Manager and SESLHD Quality Use of Medicines Committee if the cost of the medication course is > \$10,000

# Special Access Scheme (SAS)

- Supply of medications not licensed by the TGA
- Must have patient consent prior to use
- **Category A**
  - Medications that are for seriously ill patients or life-threatening conditions
  - Pharmacy can supply the medication immediately
- **Category B**
  - Medications that do not fit Category A or C
  - Pharmacy cannot supply until TGA approval received
- **Category C**
  - Medications with an established history of use
  - Pharmacy can supply medication immediately if being used for the approved indication
- SAS form must be given to pharmacy and it will be sent to the TGA

## Pharmacy

The Pharmacy Department provides a comprehensive service which supports the Quality Use of Medicines (QUM) throughout the campus hospitals.

### QUM incorporates

- Choosing the most appropriate and cost effective treatment
- Ensuring people are equipped with the knowledge and skills to use medicines to their best effect (education and training)
- Contributing to best practice through appropriate information, education and promotional activities (education and research)

Other departmental priorities to support QUM include a focus on Medication Safety and Patient Centred Care. To undertake these roles the department is staffed by a team of pharmacists with clinical expertise in a variety of areas working as part of a multi-disciplinary approach to patient care. The clinical role of the pharmacists is supported by a team of pharmacy technicians who assist in the dispensary, wards, and aseptic unit to ensure that medication prescribed is available for patients when needed. The clinical team is ably supported by the pharmacy store and administrative staff who are focused on inventory management to ensure that there is timely availability of medication.

# Clinical Business Rules

- Can be accessed via the intranet
  - SESLHD page > POWH page > policies and procedures
- Important drug policies include:
  - Electrolyte replacement
  - Warfarin
  - IV heparin
  - Iron polymaltose and carboxymaltose
  - Medication management
- Other useful webpages on the intranet
  - Antimicrobial stewardship
  - Haematology
  - SESLHD prescribing protocols

# Discharge Prescriptions

- Discharge prescriptions are generated from eMR
- Pharmacy requires two documents:
  - POV2 form (prescription output version 2)
  - Medication list section of the discharge summary
- POV2 form only needs to have the medications that need to be **supplied**
- Discharge summary needs to include **all** current medications (including unchanged home medications)
- Generally, up to **7 days** supply of new medications or changed doses are given to the patient
- There may be some circumstances where we:
  - Supply more than 7 days
  - Supply all the meds

# Discharge reconciliation window

# Discharge summary

## Discharge Referral Note – eMEDs

Smith, Mr John MRN 1XXXXXX1

DOB 27/04/1945

- Community nursing for dressing changes
- Continue metformin 500mg nocte. If requiring further control of sugars, would recommend linagliptin as additional agent.
- Augmentin Duo Forte 1 tab BD for 5 more days for HAP
- Candesartan, frusemide and spironolactone ceased – GP to kindly review need to restart
- Follow up with Dr BB (endocrinology) in diabetes clinic in February – will call with time for appointment

The above has been discussed with the patient and acknowledged.

Thank you for your continued care.

Regards,

Dr XX XX

Junior Medical Officer

Cardiology Department

Prince of Wales Hospital

## Discharge Plan

The Hospital may have supplied small quantities of new or changed medications

### Medications being taken on discharge

**Amoxicillin-clavulanate** (Augmentin Duo Forte 875mg-125mg oral tablet) 1 tab, oral, TWICE a day with food until 1/1/2021

**Metformin** (metformin 500mg oral tablet) 1 tab, oral, ONCE a day with food

BINDING MARGIN - DO NOT WRITE

If working in clinics, you may also need to write outpatient scripts that patients are to get filled at outpatient pharmacy

- S100 HSD meds
- Certain non-PBS meds

These meds are only subsidised in the hospital outpatient pharmacy. Scripts are not valid elsewhere.

For S100 meds, check the PBS website for the:

- 4 digit streamlined authority number
- maximum allowable quantity and repeats

Discharge Planning

# POW pharmacy department

- Pharmacy department is located on Level 2, Clinical Sciences Building
- Monday to Friday, Inpatients 8:30am-5pm, Outpatients 9am-4pm
- Give prescriptions to you pharmacist by 3pm for same day discharge
  - Preparation time varies depending on the day but can be 2 hours
  - 24-hours notice required for patients on Webster packs (will need to liaise with community pharmacy to update their pack)
- ED pharmacist available on weekends
- On-call pharmacist available after hours
- 7 day service coming soon:
  - Supply service
  - Clinical service to certain high risk areas (e.g. ICU)

# Take home messages

- There are several systems used to prescribe at POW
- Clinical business rules are available on the intranet for specific drugs
- Be mindful that not all drugs can be initiated for our patients. Check the local formulary (NSW statewide formulary coming later this year)
- When prescribing in clinics, use outpatient scripts and can check PBS website
- Order pharmacy consults, especially for high-risk patients / situations
- Complete eMR training!

Any questions, email [ian.fong@health.nsw.gov.au](mailto:ian.fong@health.nsw.gov.au)

# Pharmacy 7 Day Service

As of July 2023, we are here 7 days!

On the weekend we provide:

- Medication supply
  - Newly admitted patients
  - New or changed medication orders
  - Urgent discharge medications to facilitate patient flow
    - Note: coordination of complex medication needs should occur on the weekday
- CAU and ICU clinical cover (initially this will be remote support)
- ED clinical cover as per current service model

On-call pharmacist available 5pm – 8:30am
