

## Nursing & Midwifery

### Our Strategy for Transforming Person-Centred Cultures 2024-2029

#### Our purpose

The purpose of person-centred practice is to enhance the human experience. This can be achieved by co-creating positive workplace cultures to provide safe, quality and compassionate care. This will be underpinned by authentic behaviours that foster a shared understanding and innovative approaches to practice that will support positive outcomes.

Person-Centred Practice Framework, McCormack, B. and McCance, T. (Eds.) (2017)

### Priorities areas and strategic actions

Developing Person-Centred Cultures	Creating a Supportive Practice Environment	Building Research Capacity	Building a Dynamic Workforce	Fostering Leadership at all Levels	Enhancing Digital Informatics and New Technologies	Delivering High Quality, Safe Person-Centred Care
<ul style="list-style-type: none"> <li>Use the Person-Centred Practice Framework as the foundation for developing a shared understanding of person-centred practice</li> <li>Create a workplace culture that aligns person-centred values to positive behaviours</li> <li>Enhance relationships within and across teams through authentic engagement</li> <li>Develop approaches that support staff and prioritise their wellbeing</li> </ul>	<ul style="list-style-type: none"> <li>Develop workforce plans that respond to emerging trends impacting on skill mix and influencing delivery of care</li> <li>Explore innovative approaches to care delivery that maximise the Nursing and Midwifery workforce</li> <li>Explore the impact of the physical environment on the care experience</li> <li>Develop mechanisms in practice that support critical reflection and shared learning within multidisciplinary teams</li> <li>Ensure Nurses and Midwives have a voice through the implementation of a framework for shared governance</li> </ul>	<ul style="list-style-type: none"> <li>Ensure equity of access to learning opportunities for the development of research knowledge and skills</li> <li>Develop communities of practice to support Nursing and Midwifery researchers</li> <li>Establish pathways that support the development of clinical academic careers</li> <li>Increase awareness and access to research funding opportunities that support collaboration with a range of partners</li> <li>Utilise evidence to develop person-centred practice</li> <li>Celebrate and disseminate the outcomes from research and development</li> </ul>	<ul style="list-style-type: none"> <li>Explore flexible and innovative approaches to education</li> <li>Develop Nursing and Midwifery professional and career development pathways</li> <li>Foster collaborative partnerships with external education providers</li> <li>Ensure adequate investment in resources for staff to undertake educational and professional development</li> <li>Develop processes &amp; opportunities for the development of Nurses &amp; Midwives to work to their full scope of practice</li> </ul>	<ul style="list-style-type: none"> <li>Develop compassionate and person-centred leaders</li> <li>Support clinical leaders to work towards creating and supporting person centred cultures</li> <li>Invest in mentorship for all Nursing and Midwifery leaders</li> <li>Celebrate and recognise the contribution of current and emerging leaders</li> </ul>	<ul style="list-style-type: none"> <li>Establish pathways for nurses and midwives to develop capability including enhanced digital literacy and skills in data analysis</li> <li>Ensure equity and access to current, future and emerging digital technology resources for the Nursing and Midwifery workforce</li> <li>Utilisation of data to enable innovation, improvement, research and evaluation to support person centred practice</li> <li>Enhance stakeholder engagement and collaboration in the development and implementation of new technology and digital informatics</li> <li>Ensure integration of digital systems to support Nurses and Midwives to enhance person centred practice</li> </ul>	<ul style="list-style-type: none"> <li>Ensure that the person is at the centre of what we do by providing access to holistic care that is flexible, coordinated and collaborative</li> <li>Create the conditions to utilise evidence to assist in developing and delivering person centred, high quality and safe care</li> <li>Explore innovative approaches to communicating and evaluating the care experience of people</li> <li>Develop mechanisms that support all Nurses and Midwives to flourish through self-development and enhanced self-awareness as a foundation for delivery of person-centred care</li> <li>Create cultures that inspire creativity and innovation in care delivery</li> </ul>
