

VERIFICATION PROCESS FOR STUDENT COMPLIANCE

Before you can attend clinical placement you need to have your documents and immunisations verified. There are designated staff within South Eastern Sydney Local Health District that are assigned by NSW Health to complete this.

If being verified via email there are strict requirements in place that must be followed. Failure to follow them will result in your verification not being able to be processed.

All NSW Health Forms can be found at <u>https://www.heti.nsw.gov.au/Placements-Scholarships-Grants/clinical-placements/student-compliance</u>

Documents must be scanned or saved (preferably in <u>colour</u>) and submitted in <u>one PDF File</u> (*HEIC files and cloud links are not accepted*) & in the following order:

Document	Page number
Cover Sheet- Student Documentation Checklist	2
Copy of Student ID Or Photo ID	
Australian Police check	3
If Overseas Student	4
1. Police Check from home country Or any country resided in for >6 months since	
turning 18 years <u>OR</u>	
2. Overseas Statutory Declaration (appendix 3 of WCC & Other Police Checks Policy	
Directive – PD2019_003)	
NSW Health Code of Conduct Agreement	5
Undertaking/Declaration Form	6
TB Assessment Tool (including any TB testing or clinical review documentation)	7-8
Blood Borne Virus Declaration Form (Medicine, Midwifery, Paramedicine and Dentistry & Oral	9
Health Students only)	
Vaccination and Immunisation evidence (including supporting documentation such as	10-12
Lab reports)	

Frequently Asked Questions are included on Pages 13-15

Important Information

- All documentation <u>MUST</u> match the student ID card, Police Check and ClinConnect unless a marriage certificate or change of name certificate has been provided.
- All correspondence **MUST** be sent from your university email account- emails sent from private email address will automatically be deleted. All emails containing follow up documentation will need to be accompanied by your student ID
- IF you do not receive an automated reply from the SESLHD mail box within 15 minutes of submission - please review total attachment size - aim to keep attachments under 20MB total. Either ZIP the file or submit separate emails if all attempts to decrease file size fail

Please email through to SESLHD-StudentCompliance@health.nsw.gov.au

Email SUBJECT: SURNAME, STUDENT ID (UNSW students- leave out the "z", only include the number) Please allow up to **10 business days** for a response

Please note: The NSW Health ClinConnect system is an external site to your university account, there can be a 24-48 hour delay in the data being transferred over.

The following pages include an example of what is expected in your submission.

Diseases	Evidence of Vaccination	Serology Evidence	Other Acceptable Evidence
Diphtheria, Tetanus, Pertussis	One <u>adult</u> dose of diphtheria/tetanus/pertussis vaccine (dTpa) within last 10 years (Not ADT)	Serology will not be accepted	Approved Contraindication
Hepatitis B	 History of age appropriate course of Hepatitis B vaccine AND evidence of anti-HBs (surface antibodies) greater than or equal to 10mIU/mI "Accelerated" course not accepted. 	1. Completed hep B Statutory Declaration (Appendix 9) which confirms verbal history of course AND 2. evidence of anti-HBs (surface antibodies) greater than or equal to 10mlU/ml	Documented evidence of anti-HBc, indicating past Hepatitis B Infection or HBsAg+
Measles, Mumps, Rubella (MMR)	Birth date before 1966		
Varicella	BORN AFTER 1966 ** Positive IgG for varicella	Approved Contraindication	
Southern Hemisphere Influenza Vaccine (mandatory between 1 st June- 30 th Sept)	One dose (administered after 1 st March). Must be a southern hemisphere formulation (Overseas students are advised to receive the vaccine in Australia)	Serology will not be accepted	Approved Contraindication

Document 1 - Australian Police Check

Australian police checks must be obtained from one of the following:

- Australian State or Territory Police Force or,
- Australian Federal Police, or
- Australian Criminal Intelligence Commission (ACIC) accredited body only.

National criminal record checks are valid for five years since the date of issue.

Existing NSW Health staff members do not need to provide a Police Check. They can contact <u>HETI Student Placements</u> to enter their NSW Health police check information into ClinConnect.

Document 1.1 (only for international students): Overseas Police Check OR Overseas Statutory Declaration

Overseas Police Check Requirements:

- If obtaining a Police Check from overseas it MUST be in English or officially translated to English and issued within the last 5 years
- If you are an overseas student you must obtain a police check from your home country <u>AND</u> any countries you have resided in for 6 months or more since turning 18 years of age
- If unable to obtain an overseas police check then a statutory declaration can be completed available from <u>HERE</u> (see example on this page)
- Statutory Declarations can only be witnessed by certain people within NSW these are:
 - Justice of the peace (JP)
 - o Registrar-General or Deputy Registrar-General
 - o notary public
 - o commissioner of the court for taking affidavits
 - Australian legal practitioner authorised by section 27 (1) to take and receive any affidavit
 - o a federal judicial officer, or other person by law authorised to administer an oath

Relevant NSW Health Policy:

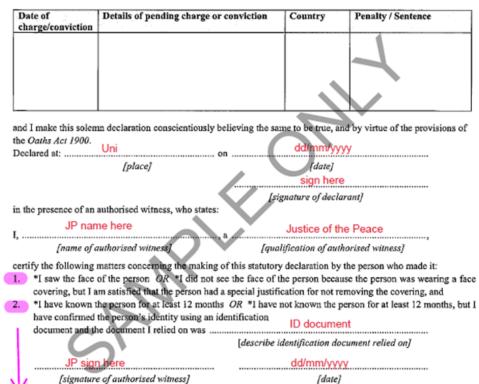

Working with Children Checks and other Checks Policy Directive(PD2019_003)

STATUTORY DECLARATION OATHS ACT 1900, NSW, EIGHTH SCHEDULE

For overseas applicants or students -applicants for aged care work must use the Commonwealth Aged Care Statutory Declaration

charges in my country of origin or any country, outside of Australia, which I have resided in for a period exceeding six months when aged 18 years or over.

* Cross out any text that does not apply

NOTE 1.-A person who intentionally makes a false statement in a statutory declaration is guilty of an offence, the punishment for which is imprisonment for a term of 5 years - see section 25 of the Oaths Act 1900 (NSW).

NOTE 2.-A statutory declaration under the Ootke Act 1900 (NSW) may be made only before a Justice of the Peace; a Legal Practitioner; a Judicial Officer; or a person authorised to witness a declaration in the Jurisdiction in which it is swom.

NOTE 3 - *identification document* means either a primary identification document within the meaning of the <u>Real Property Regulation 2008</u>, or a Medicare card, pensioner concession card, Department of Veternas' Affairs entitlement card or other entitlement card insued by the Commonwealth or a State Government, a credit card or socoant (or a passbook or statement of account) from a bank, building society or credit union, an electoral enzotment card or other evidence of encolment as a elector, or a student identity card, or a certificate or statement of enrolment, from an advactional institution.

Document 2- <u>NSW Health</u> <u>Code of Conduct Agreement</u>

Students must read and agree to abide by the NSW Health Code of Conduct – available at: <u>NSW Health</u> <u>Code of Conduct (PD2015_049)</u>

Please complete all sections of agreement form

DO NOT sign and submit the whole Code of Conduct document- only this one page agreement form

NSW Health Code of Conduct Agreement for Students

Step 1: Read the NSW Health Code of Conduct

The NSW Health Code of Conduct is available here: https://www1.health.nsw.gov.au/pds/ActivePDSDocuments/PD2015_049.pdf

Step 2: Enter your details		
Name:		
Date of Birth:	Gender:	Student ID:
University/TAFE/Training Organisation:		
Email address:		

Step 3: Declaration and signature

- I have read and understood the NSW Health Code of Conduct, and agree to comply with its provisions at all times whilst attending student placements in NSW Health.
- 2. I undertake that if I am charged or convicted of any criminal offence after the date of my National Police Certificate that I will notify NSW Health before continuing with my clinical placement.
- 3. I declare that the information I have provided to NSW Health for the purpose of undertaking student placements is correct to the best of my knowledge. I understand that if I am found to have deliberately withheld or provided false information, my placements may be withdrawn.

Document 3 - Undertaking/Declaration Form

Ensure All sections are completed

For PART 2 – response is either A OR B

Most students will be 2. A

2.B is only if you:

- Have had x2 full courses (i.e. 6 • documented doses in total) of hepatitis B vaccination and still have no immunity AND/OR
- have a documented medical ٠ contraindication to any vaccination (this does not include a hepatitis B declaration for not having evidence of vaccination)

Relevant NSW Health Policies:

Occupational Assessment, Screening and Vaccination Against Specified Infectious Diseases (PD2024_015) Principles for the Management of Tuberculosis in New South Wales

Supplemental TB Documentation

If you have been born in a <u>high incidence TB</u> <u>country</u> OR have had <u>cumulative*</u> travel > 12weeks to high incidence countries then you will require TB screening

*Cumulative = <u>collective</u> time of travel, EVER, in your lifetime (or since last screening). Therefore, could be multiple small trips over multiple years

(Please Note: there are also other indications for testing and referral to a TB service – please refer to <u>Appendix 3</u> for the decision support tool for further information)

TB screening is to identify evidence of latent (or active) TB infection. Accepted tests for latent TB infection are an interferon gamma release assay (IGRA), or tuberculin skin test (TST, also known as Mantoux test)

A TB screening test will be valid if the following criteria are met:

- the person has no known TB exposure and has stayed/travelled for a cumulative period of less than 3 months in a country or countries with a high incidence of TB since the test was undertaken
 - NOTE: if you are an overseas student that requires TB testing please get the IGRA no longer than 3 months prior to arrival date in Australia and DO NOT get a TST/Mantoux as we cannot accept it and we will need to repeat testing
- the test was performed prior to, on the day of, or at least 4 weeks after, a live parenteral vaccine
- a TST that was administered and read by an Australian state or territory TB clinic, or collaborating service endorsed by the Local Health District or Specialty Health Network TB service/ chest clinic, or
- an IGRA test was performed, and the results are reported in English

IF your IGRA test is POSITIVE:

Please follow up with your Dr as you require a Chest x-ray. You will also require an appointment with an <u>NSW Health Chest Clinic</u>

NOTE: you can be granted temporary compliance if you submit a 'clear' Chest x-ray (as documented by your Dr) AND confirmation of a Chest Clinic Appointment

Document 5 – <u>Blood Borne Virus</u> <u>Student Declaration Form</u>

This form is only for students studying:

- Medicine
- Midwifery
- Dentistry & Oral Health
- Paramedicine

Students are required to be screened for BBVs every 3 years. Once screened please complete the form (ensuring the date of most recent test is documented), sign and submit the form.

PLEASE NOTE: We <u>do not</u> require a copy of the screening results (except for hepatitis B immunity results)

Relevant NSW Health Policy:

Management of health care workers with a blood borne virus and those doing exposure prone procedures (PD2019 026)

Management of health care workers infected with HIV, hepatitis B or hepatitis C and health care workers who perform exposure prone procedures

Attachment 1: Blood Borne Virus Student Declaration Form

Initials

All student health care workers of a discipline* that undertakes

exposure prone procedures (EPPs) must complete this document prior to their first clinical placement, and again after repeat testing has been undertaken every three years. Students will only be permitted to attend clinical placements if they have submitted this form.

The educational provider must ensure that all student health care workers of a discipline* that undertakes EPPs have completed this form and submitted it for assessment by NSW Health.

Declaration

I have read and understand the requirements of the <u>Australian National Guidelines for</u> the <u>Management of Healthcare Workers Living with Blood Borne Viruses and</u> <u>Healthcare Workers who Perform Exposure Prone Procedures at Risk of Exposure to</u> <u>Blood Borne Viruses</u> and the NSW Health policy <u>Management of health care workers</u> infected with HIV, Hepatitis B or Hepatitis C and health care workers who perform exposure prone procedures.

Select either A or B

- A: I have undergone testing for blood borne viruses** (BBVs) at commencement of study in Australia or within the 12 months prior to commencement.
- B: I have undergone a repeat test for BBVs within a three year period from the date of my last test.

The date of my test was:

I agree to the following:

- be tested for Hepatitis B, Hepatitis C and HIV at least once every three years.
- have appropriate and timely testing and follow up care after a potential occupational exposure associated with a risk of BBV acquisition.
- have appropriate testing and follow up care after potential non-occupational exposure, with testing frequency related to risk factors for virus transmission.
- notify the person identified in the health facility local procedures if I am newly diagnosed with a BBV and will refrain from performing EPPs until a risk management plan has been developed by the NSW Health agency during the placement.
- cease performing all EPPs if diagnosed with a BBV until the criteria in the <u>National Guidelines</u> are met.

	Declaration: Ideclare that I comply with the requirements of the National Guidelines and that the information provided is correct.						
	Full name:	Date of Birth:	Student ID:				
	Email:	Education Provider:					
	Date: Signature:						
•	to in the state destate the second se	the standard second state of the state of th	distance department and sharefully				

*Disciplines that undertake exposure prone procedures include: medicine; midwifery, paramedicine; dentistry and oral health. **Relevant blood borne viruses are Human Immunodeficiency Virus (HIV), Hepatitis B and Hepatitis C.

Document 6 + more – Vaccination and Immunisation evidence

If born/grew up in Australia:

Preferred evidence is a statement of ALL immunisations from the Australian Immunisation Register (downloaded from MyGov>Medicare)

Other evidence may be:

- Completed NSW Health Vaccination Card (example of current version below and available <u>HERE</u>, however older versions will also be accepted)
- Serology Lab reports
- Documentation on a letterhead from your Dr
- Other documentation that we are satisfied is authentic

Evidence we may not accept:

- Baby book entries that have no discernible vaccination provider certification
- Any documentation that does not have your FULL NAME and DOB on it and has not been signed/verified by a vaccination provider

Vaccination and Immunisation evidence: information for overseas students

If born/grew up overseas:

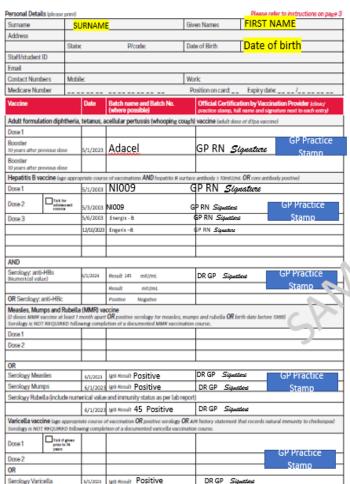

- All evidence must be documented in English (including your name and all vaccination details).
 - Vaccination records recorded in a foreign language may be translated using the <u>Free Translating</u> <u>Service website</u> provided by the Department of Home Affairs or using a local translation service.
- Vaccination Providers Overseas can use the NSW Health Vaccination Record to transcribe vaccination records provided the same requirements are completed as per previous page
- Vaccine brand names are required especially as there are different formulations and combination vaccines differ from country to country.
 - A common example is in the UK: "DTP" is a vaccine containing diphtheria, tetanus and polio (NOT pertussis)
 - Another example is some countries do not cover Measles, Mumps, Rubella (MMR) in one vaccine

Considerations when using the <u>NSW Health</u> Vaccination Record Card

- Card can only be completed by the vaccination provider (NEVER the student)
- Student Identifiers must be documented on every page (Full name and DOB as a minimum)
- Full date and brand name must be included (batch numbers are recommended but not mandatory)
- Every section of the card that is completed must be certified that is the vaccination provider MUST:
 - Print their name and designation (role)
 - Sign each entry
 - Provide a clinic/practice stamp (if available)
- Diphtheria, Tetanus, Pertussis: Please ensure the BRAND or batch number is documented so we can verify the Correct vaccine has been received. Note: ADT/"Tetanus" vaccines do not cover for pertussis
- IF submitting serology results for **MMR or Varicella** if the numerical result is documented then the immunity status MUST be included as well i.e. positive/negative/equivocal. Alternatively-provide the lab reports
- RUBELLA serology must be documented with BOTH the numerical result AND immunity status. <u>Therefore, we</u> recommend that you always include the lab report for Rubella
- NOTE: IF you have documentation of full MMR and Varicella vaccination <u>do not check serology.</u>

Frequently Asked Questions Regarding Vaccination Requirements:

Diphtheria, Tetanus, Pertussis:

- I had all my childhood doses, but no adult dose within the last 10 years, do I need another dose? YES – dTpa is required every 10 years and MUST be the adult formation
- Can I have a blood test to prove immunity? NOvaccination is mandatory
- I have a medical contraindication to dTpa vaccination, can I still be compliant? Possibly-Medical contraindication may be accepted, as specified in the <u>Australian Immunisation Handbook</u>, recorded on the Australian Immunisation Register (AIR) - <u>immunisation medical exemption form</u> (IM011) AND AIR immunisation history statement (IHS), for assessment by the NSW Health agency.
- I had a dose in the last 10 years but don't have the documentation, what do I do?

The documentation MUST be supplied. Your options are:

- 1. Get a dose now
- 2. Try and track down your records- check your AIR statement, GP records or school vaccination records

Measles, Mumps, Rubella:

- I have 2 documented doses of MMR vaccine (given at least 4 weeks apart), do I need to check my bloods for immunity? NO- serological testing is NOT recommended after a completed vaccination course
- I have 2 documented doses of MMR AND serology which shows a negative/low positive/equivocal result to one of the diseases – am I still compliant? YES - A documented age-appropriate MMR vaccination course supersedes the results of subsequent serologic testing. However, women of childbearing age with a complete MMR vaccination course and negative rubella immunity will be informed to attend their doctor for a discussion about individual risk and advice about additional doses.
- I have 1 documented dose of MMR AND serology which shows a negative/low positive/equivocal result to one of the diseases – what do I do? if you have submitted serology that is not definitively POSITIVE to all 3 diseases, you will need ONE dose of MMR (DO NOT REPEAT serology afterwards)
- I have no documentation of MMR vaccination (but know I had it) AND serology which shows a negative/low positive/equivocal result to one of the diseases – what do I do? if you have submitted serology that is not definitively POSITIVE to all 3 diseases AND do not have any documentation of previous vaccination then you need to complete a full course. This means x 2 doses at a minimum 28 days apart (DO NOT REPEAT serology afterwards)
- I have a medical contraindication to MMR vaccination, can I still be compliant? Possibly- Medical contraindication may be accepted, as specified in the <u>Australian Immunisation Handbook</u>, recorded on the Australian Immunisation Register (AIR) - <u>immunisation medical exemption</u> form (IM011) AND AIR immunisation history statement (IHS), for assessment by the NSW Health agency.

Relevant NSW Health Policy:

Frequently Asked Questions Regarding Vaccination Requirements:

Hepatitis B:

- I had all my childhood doses; do I need serology (blood test)? YES the requirement is twofold:
 1. Evidence of an age-appropriate hepatitis B vaccination course AND
 - 2. Serology showing immunity

A 6-month Temporary compliance period will only be granted if serology has been completed (when serology shows no immunity- please see point 3 below for further info)

- I have just commenced a course of vaccination can I still go on placement? YES- you will be granted a 6-month temporary compliance period to complete the requirements. The minimum intervals of vaccination that complies with the NSW Health Policy & Australian Immunisation Handbook are as follows. It is advisable to follow these intervals to prevent your temporary compliance period lapsing and becoming not compliant (Please ensure you discuss this with your GP/vaccination provider as some may not be aware of the current minimum intervals):
 - a <u>minimum</u> interval of 1 month between the 1st and 2nd dose; and
 - a *minimum* interval of 2 months between the 2nd and 3rd dose; an
 - a <u>minimum</u> interval of 4 months (or 16 weeks) between the 1st and 3rd dose.
- I have evidence of one age-appropriate course (x 3 doses as an infant or adult OR x 2 doses given between 11-15 years), however my serology does not show immunity, what's next? From a Compliance point of view, you will be granted a 6-month temporary compliance period to have further dose(s) and repeat serology.
 - If you have a documented course in the past, the <u>advice in the Australian Immunisation</u> <u>Handbook</u> is to receive one booster dose (Dose 4) then repeat serology a minimum 4 weeks later (it is not always necessary to have a full 2nd course).
 - If immune, you will be compliant
 - If remains not immune, then:
 - 1. Ensure you are tested for hepatitis B virus infection (if have not been previously checked)
 - 2. If nil infection- you should receive 2 more doses minimum ONE MONTH apart. NOTE: As this is a second course- the minimum intervals that are stipulated for Primary (first courses) do not apply. Please ensure you discuss this with your GP/vaccination provider as some may not be aware of the current recommendation. Once you receive the additional 2 doses, serology should be checked a minimum 4 weeks after the final dose
 - If still not immune after x 2 documented age-appropriate vaccination courses, then you will be recognised as a persistent non-responder and advice will be provided so you know what to do if you ever have an exposure. You will be considered Compliant with the Policy

PLEASE NOTE: Temporary compliance is granted only once and cannot be extended when it is clear that the above advice has not been followed or there was a failure to follow up in the adequate time frame.

Occupational Assessment, Screening and Vaccination Against Specified Infectious Diseases (PD2024_015)

Hepatitis B:

- I had a full vaccination course in the past but don't have the documentation AND serology shows NO immunity, what do I do? You will require a full age-appropriate vaccination course and repeat serology at the end of the course. A verbal history or hepatitis B vaccination declaration <u>cannot</u> be accepted.
- I had a full vaccination course in the past but don't have the documentation AND serology shows immunity, what do I do? As long as you (or your parent/guardian) are 100% sure that you have completed a course, you can complete a <u>Hepatitis B</u> <u>Declaration Form</u> with your GP or appropriately trained health care provider (as defined on the form). You must include the: number of doses received; approximate year of vaccination and; the reason for not having the records (e.g. lost/did not keep records of evidence)

NSW Health NSW Hepatitis **B** Vaccination Declaration Occupational Assessment, Screening and Vaccination Against Specified Infectious Diseases This form is to be used where a hepatitis B vaccination record is not available Stafflink/candidate ID eted by the Declarant in conjunction with an approp declare that clarant in CAPITAL LETTER age-appropriate course of hepatitis B vaccine consisting of ar I was vaccinated against hepatitis B was make this declaration believing it to be true Applying my clinical judgement, I am satisfied that the declarant's hepatitis B vaccination history and serology of compliance and long term protection Assessor qualificatio Date

Frequently Asked Questions Regarding Vaccination Requirements:

Varicella :

- I have 1 documented dose of Varicella vaccine when I was under 14 years of age, do I need to check my bloods for immunity? NO-serological testing is NOT recommended after a completed vaccination course
- I had chicken pox as a child and should be immune aren't I compliant? You likely will be immune, HOWEVER unless you have evidence of vaccination, you will require serology showing immunity
- I have a documented age-appropriate vaccination course of Varicella AND serology which shows a negative/low positive/equivocal resultwhat do I do? Protection is assumed: You DO NOT need further vaccines as commercial labs often are not sensitive enough to detect all seroconversions- you will still be compliant
- I have no documentation of Varicella vaccination AND serology which shows a negative/low positive/equivocal result to one of the diseases

 what do I do? if you have submitted serology that is not definitively positive <u>AND</u> do not have any documentation of previous vaccination then you need to complete a full course. This means x 2 doses at a minimum 28 days apart (DO NOT REPEAT serology afterwards)
- I have a documented medical contraindication to Varicella vaccination/ "live" vaccines, can I still be compliant? Possibly- Medical contraindication may be accepted, as specified in the <u>Australian</u> <u>Immunisation Handbook</u>, recorded on the Australian Immunisation Register (AIR) - <u>immunisation medical exemption form (IM011)</u> AND AIR immunisation history statement (IHS), for assessment by the NSW Health agency.

Influenza Vaccination:

- When do I need to have the flu vaccine? Seasonal Flu vaccination needs to be given prior to 1st June and is mandatory for all clinical placements occurring between 1st June- 30th September every year
- I had the flu vaccine overseas am I compliant? Unless it is clearly documented and can be verified as the current season's TGA approved Southern Hemisphere flu vaccine we cannot accept overseas flu vaccine evidence. Therefore, we recommend waiting to receive the flu vaccine once you arrive in Australia
- How do I know the vaccine is the current flu season's vaccine? The flu vaccine in Australia is generally available from early March every year, therefore if you receive a vaccine prior to March 1st, it is not considered the current seasons vaccine and you will need to repeat the dose
- I don't have a clinical placement until after 30th September- do I still need to have the flu vaccine? From a compliance point of view - No you do not (however we strongly recommend all students have the flu vaccine- also check your uni requirements)
- I have a medical contraindication to the flu vaccine or wish to not receive it what do I need to do? Medical contraindication may be accepted, as specified in the Australian Immunisation Handbook, recorded on the Australian Immunisation Register (AIR) - immunisation medical exemption form (IM011) AND AIR immunisation history statement (IHS), for assessment by the NSW Health agency.

If you wish to decline the flu vaccine there are additional requirements and a declination form to complete and comply with (Refer to Section 6.1 of PD2024_015)

COVID Vaccination:

 No longer required as per NSW Health Policy – however all students are encouraged to be informed of current recommendations for their personal medical circumstances and age
